

SW60

Natural treatment for horses

Trial 1

Veterinarian: Dr. Larry Agle

Patient: 16 Year Old Hanoverian Gelding

8/11/17

Presenting Complaint: Lameness, upon further inspection large areas of pastern dermatitis noted on hind pasterns and hind ankles.

Cleaned affected areas, and dried areas thoroughly before application of SW60.

Administered a Excede shot to help with any underlying infection.

Instructions were to keep area clean and dry. Apply SW60 1 time daily for one week

8/18/17

Rechecked pastern dermatitis, affected areas were greatly improved, small amount still present. Treatment plan was to continue same treatment for one more week.

9/1/17

Dermatitis was healed and skin was healthy in appearance.
